Long life
- large PTFE junction provides resistance to fouling
- double junction with gelled electrolyte provides better-defined junction potentials, creating an inherently-stable reference junction that is resistant to poisoning

High accuracy
- specially formulated, low sodium-error glass for accuracy at high pH
- temperature sensor positioned perfectly to compensate for measurement and reference element temperature, ensuring rapid compensation and process temperature tracking

High reliability
- operates up to 105 °C (221 °F) and 6 bar (90 psi) @ 25 °C (77 °F)
- fouling-resistant flat glass available

High flexibility
- suitable for a wide range of applications
- available for insertion, immersion, flow-through and hot-tap
- standard- and blue-glass options
- bulb and flat-glass options

Economical
- cost-effective
- long life
- highly reliable

A reliable economic solution for a wide range of applications
Introduction
ABB provides an unrivalled range of dedicated pH/Redox (ORP) sensors for a wide range of industrial duties.

The AP300 range of pH/Redox sensors offers a reliable and cost-effective solution for most industrial pH applications. It is the perfect starting point for pH or Redox measurements.

Combining measurement, reference and temperature compensation elements in a single unit, the AP300 is an economical solution for a wide variety of industrial applications; including water, food, pharmaceutical and chemical.

The AP300 probe is available in three different body types enabling the sensor to be used in immersion, insertion/flow-through and hot-tap applications.

The 'Hot-tap' sensor variant enables fitting and retraction through a standard, full-port ball-valve keeping maintenance costs to a minimum.

Robust Design, Maximum Protection
The electrolyte is a highly resistant gel, faced with a large area, dirt-resistant PTFE junction. These are encapsulated in a robust body, providing maximum resistance to chemical attack. The sensor can withstand operating conditions up to 105 °C and 6 bar @ 25 °C (221 °F and 90 psi @ 77 °F).

Insertion, Flow-through, Immersion (Dip) and Hot-tap

AP301
General-purpose in-line/immersion, twistlock sensors.

The AP301 is a PPS (Ryton) sensor for general applications that can be adapted to 1 in. NPT fittings using threaded twistlock process adapters. Dip-type immersion is achieved using an immersion guard and connection of the 3/4 in. NPT back-thread to a customer-supplied dip-tube.

For flow-through applications, a flow cell can be fitted with either 1 in. BSP (part no. 7670043) or 1 in. NPT (part no. 7670046) threaded process connections.
**AP302 and AP303**
General-purpose insertion, flow-through, immersion, 3/4 in. NPT threaded sensors.

The AP302 and AP303 are constructed from PVDF (Kynar) and can be used in insertion/flow- or dip/immersion applications.

AP302 models have no sensor guard (flush) for use with flat glass to provide a flow-cleaned configuration.

AP303 models have a notched sensor guard to protect the bulb glass.

**AP303 Notched Sensor**

**Flat / Notched Sensor**
Notched sensors are provided to protect the bulb glass and are especially suited to retractable and immersion sensors.

**Applications for Sensor Styles**

**AP304 and AP305**
General-purpose, hot-tap retractable sensors.

Completing the series, the AP304 and AP305 are fully-retractable PVDF stainless steel-clad sensors. With these sensors, project and maintenance costs can be reduced significantly as the need for expensive by-pass systems or long immersion sensors are eliminated.

**AP304 and AP305 Anti-blowout Tip and Hand-compression Fitting Safety Features**

- Anti-blowout Tip
  - prevents accidental sensor removal

- Compression Fitting
  - fixes sensor in position
  - shrouds the body nut
  - prevents accidental removal

- Nut
  - locks sensor to ball valve
Hot-tap Sensor
The safety of operators is paramount. This is maintained by incorporating an anti-blowout tip in the design of the AP304 & AP305; preventing accidental sensor removal. Unlike chain restraints, this safety-by-design is an integral part of the sensor's construction.

Ball-valve connection is achieved with either wrench or hand fittings. The hand compression fitting provides additional safety through two separate locking rings. A body nut union ring locks the sensor to the ball valve and enables sensor dismounting without complete disassembly. In addition, a compression ring fixes the sensor into position at the required insertion depth and seals the body from the process. This compression ring has an integral shroud that prevents access to the smaller body nut when the compression ring is loosened for sensor maintenance.

AP305 Hot-tap Sensor
Double Junction for Long Life

To maximize the life-span of the sensor, the AP300 features an inherently-stable, double junction arrangement. In addition, the sensor is designed to resist poisoning in two ways, by:

- effectively doubling the length of the diffusion path between the PTFE interface and the electrode, so any poisoning from the sample takes longer to reach it.
- discouraging any movement of the reference gel around the electrode by enclosing it in a glass tube open only at the top.

Temperature Compensation

The AP300’s temperature compensator offers fast response and high accuracy. The temperature sensor is located at the tip of the AP300, together with the measuring and reference electrodes. This arrangement provides accurate process temperature measurement used to compensate for the effects of temperature on the electrodes to produce a precise pH measurement.

The temperature compensator is available as Balco 3k or Pt100.
Glass Options
The AP300 range is available with ABB’s specially formulated standard pH-sensitive glass or, optionally, with low-resistance glass that speeds up the response of the sensor by an order of magnitude at temperatures below 60 °C (140 °F). For applications with higher pH levels and temperatures, ABB’s standard glass offers a much lower sodium error than competing products; enabling the sensor to maintain its accuracy even at very high pH levels, when sodium ions would otherwise cause inaccurate readings.

Sodium error at 25 °C (77 °F): 0.02pH in 1M NaOH

Flat-glass
The flat end and glass design promotes self-cleaning and provides maximum resistance to fibrous build-up.
Cable Options

Several connections are possible from the probe. An integral cable with tagged pins for direct connection to a transmitter or a male BNC connector for connection to an extension cable. Both tagged and BNC cables are available in versions that accommodate temperature signals. Cables are available in short, junction box-only lengths and 5 m (16 ft), 10 m (33 ft), 20 m (66 ft) and 30 m (98 ft) lengths.

Specification

General

pH measuring range

- Standard (yellow glass) 0 to 14 pH
- Low Temperature (blue glass) 0 to 10 pH

Redox (ORP) measuring range

-2000 to 2000 mV

Temperature range

- Body 0 to 105 °C (32 to 221 °F)
- Bulb glass 0 to 105 °C (32 to 221 °F)
- Flat glass 5 to 100 °C (41 to 212 °F)
- Blue glass -5 to 60 °C (23 to 140 °F)
- Redox (ORP) 0 to 105 °C (32 to 221 °F)

Pressure maximum

- 6 bar (90 psi) @ 25 °C (77 °F)

Temperature compensator (pH sensors only)

- Integral Pt100 or Balco 3 kΩ

Wetted materials

- pH electrode Glass
- Redox (ORP) electrode Platinum
- Junction PTFE
- Body AP301 PPS (Ryton)
- Body AP302/3 and AP304/5 PVDF (Kynar)
- Flow cell PVC
- Immersion guard PVC
- AP304 and AP305 shaft and valve Stainless steel

pH glass types

- Bulb general duties
- Flat in-line, self-cleaning
- Blue low temperature

Reference system

- Ag/AgCl-3.5M KCl in gel matrix

Reference junction

- Porous PTFE

Spares and Accessories

Flow Cells

- 1 in. NPT (for adapter) + 7670 046
- 1 in. NPT (for process connection) 7670 043

Flow Cell Pipeline Adapters

- 1 in. BSPT to ½ in. BSPT polypropylene 7601 420
- 1 in. BSPT to ½ in. NPT polypropylene 7601 430

Extension Cables

- Tagged pin extension cables (5-core1015/16X for AX460 and AX466)

  - 5 m (16 ft) 1015 160
  - 10 m (33 ft) 1015 161
  - 20 m (66 ft) 1015 162
  - 30 m (98 ft) 1015 163

Buffer Sachets (Box of 25)

- pH 4 0400/110
- pH 7 0400/120
- pH 0 0400/130

### Body Style

- **Twist-lock insertion/immersion (TB551 style)**
  - Standard insertion – no sensor guard (flush) | 1 |
- **3/4 in. threaded insertion/immersion (TB556 style)**
  - Insertion depth 28 mm (1.1 in.) – no sensor guard (flush) | 2 |
  - Insertion depth 38 mm (1.5 in.) – notched sensor guard | 3 |
- **Hot-tap ball valve insertion (TB557 style)**
  - No sensor guard (flush) | 4 |
  - Notched sensor guard | 5 |

### Measuring Electrode

- **Flat glass pH for in-line, fouling applications (5 to 100 °C [41 to 212 °F], 0 to 14 pH)** | 1 |
- **Standard yellow glass, pH (0 to 105 °C [32 to 221 °F], 0 to 14 pH)** | 2 |
- **Low resistance blue glass, pH (~5 to 60 °C [23 to 140 °F], 0 to 10 pH)** | 3 |
- **Platinum, Redox (ORP)** | 5 |

### Integral Temperature Sensor

- **None – Redox (ORP) sensors only** | 0 |
- **Pt100 – pH sensors only** | 1 |
- **3 kΩ – pH sensors only** | 2 |

### Liquid Junction

- **Teflon** | 0 |

### Junction Box or Integral Cable Length

- Short length cable – supplied without junction box | 0 |
- 3 m (10 ft) | 1 |
- 6 m (20 ft) | 2 |
- 9 m (30 ft) | 3 |
- Integral junction box supplied with short length cable | 8 |

### Sensor Connectors

- Tagged Pin Leads – all tagged terminations | 0 |
- Connectors – BNC on pH/Redox (ORP) + temperature compensator connector (if used) | 1 |
  - Also select for electrodes used with junction box |

### Accessory Hardware

- No accessory supplied | 00 |

**For AP301**

- 1 in. NPT, twist-lock adapter – Ryton (PPS) | 12 |
- PVC immersion (dip) guard | 13 |

**For AP304 & AP305**

- 406 mm (16 in.) stainless steel sheath | 20 |
- 406 mm (16 in.) stainless steel sheath and 316 stainless steel wrench fitting | 21 |
- 406 mm (16 in.) stainless steel sheath and 316 stainless steel hand fitting | 22 |
- 508 mm (20 in.) stainless steel sheath | 23 |
- 508 mm (20 in.) stainless steel sheath and 316 stainless steel wrench fitting | 24 |
- 508 mm (20 in.) stainless steel sheath and 316 stainless steel hand fitting | 25 |

### Instruction Manual

- No manual supplied (replacement sensors only) | 0 |
- English | 1 |
- French | 2 |
- German | 3 |
- Spanish | 4 |
